

TECHNICAL DATA SHEET

EGG CRATE / LOUVRE Lighting Diffuser Panel

Each SLP Series louvre is a meticulously designed cellular system of highly reflecting surfaces coupled with a high percentage of open louvre area. As a result, high lumen efficiency and maximum illumination control is obtained by concentrating light within the 0-45/60 degree viewing zones whilst limiting the brightness in the higher viewing angles.

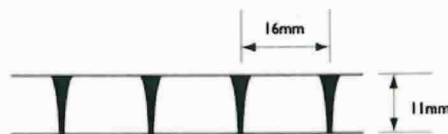

Specification

Y121

The perfectly square cell pattern with pristine opal finish combine to provide panels equally suitable for use as diffusers in luminaries and as perfect contrast to patterned tiles in suspended ceilings.

Material	Polystyrene
Cell Size	16x16x8mm
Stock Panel	1213x603mm
Size	
Colours	Opal, Black

Y106

Where economy or low height is a major consideration, this louvre fulfils both requirements. Suitable for all general installations.

Light opening Area	57%
Cell Size	16x16x11mm
Stock Panel	1208x602mm
Size	
Colours	Silver
